

SHROUD

Night vision helmet mount system, Universal hybrid model shroud for ACH/MKII/Viper helmets. The ZA L4 Hybrid shroud fits most Combat MKII/ACH/VIPER style helmets drilled with either the standard three holes (MARSOC/WARCOM) pattern or the standard one pattern. The universal shroud creates a solid mounting platform for Wilcox Mounts. The sleek, yet aggressive polymer frame design is low profile, so it will not snag on ropes, lines risers, and straps. ZA mount solution does not request the retractable lanyard system

The shroud is manufactured from high impact composite nylon with aircraft aluminium CNC machined insert that the Shroud bracket mounts onto. This insures very tight dimensional tolerances, which stabilizes the mount.

SPECIFICATION

- Accommodates: Wilcox G24 Mount, Wilcox G22 Mount, Wilcox ANVIS/ PVS-23 Mount, Wilcox G11 Mount, Notoros AKA 2 Mount, Norotos Improved Mounts
- U.S. Army Standard Rhino Arm
- Material Construction: Lightweight high quality aluminium, polymers

FEATURES

- Ideal for replacing the original helmet "hook and strap" mounting system
- Snag free for HALO, HAHO and static line operations
- Fits all ACH, MICH, VIPER and lightweight marine helmets with MARSOC/WARCOM 3-hole Pattern or standard US army 1 hole pattern
